Education

Southeast University

B. Sc in Computer Science And Engineering(CGPA of 3.68)

Dhaka, Bangladesh

Summer 2018 - summer 2022

Experience

Fortis Garments Ltd.

Software Engineer

Dhaka, Bangladesh

1 January 2025 – Present

- Developed and provided support for multiple projects, including the ERP system for Torr Clothing brand, POS software, and HF Rule Management, ensuring smooth business operations and efficient workflows.
- Utilized ASP.NET Core Web API for backend development, ASP.NET Core MVC for frontend interfaces, and MS SQL with ADO.NET for database management, incorporating JavaScript and jQuery for enhanced user interaction and functionality.

NDE Technology Services Ltd.

Associate Software Engineer

Dhaka, Bangladesh

1 July 2023 – 31 December 2024

- Successfully transitioned to a full-time role, actively contributing to diverse projects using ASP.NET Core Web API, Core MVC, Angular, and more.
- Prioritizing company objectives, I actively engaged in team projects, utilizing a comprehensive tech stack to develop applications tailored to specific user requirements.

Software Engineer Intern

18 December 2022 - 30 June 2023

- Developed robust MVC web applications and desktop applications with responsive interfaces, leveraging MVC architecture, Web APIs, and intuitive frontends using Vanilla JS, HTML, CSS, and Bootstrap to meet business requirements and ensure a seamless user experience.

Classtune

Frontend Developer Intern (Angular)

Dhaka, Bangladesh

14 July 2022 - 29 October 2022

- Internship at Classtune (July 14th to October 29th) as a Frontend Developer, focusing on Angular framework.
- Developed a todo web application frontend using Angular during the internship.

Projects

Torr ERP | *Asp.net Core MVC (modified framework), Asp.Net Core Web Api, bootstrap, jquery, MSSQL-20*

- Designed and developed a full-scale ERP system for Torr Clothing brand, managing operations across multiple outlets, covering the entire process from vendor procurement to product sales.

Steel ERP | *Asp.net-MVC6 (modified framework), bootstrap, jquery, RDLC, MSSQL-2016*

- Developed key ERP modules, including Inventory, Cost / Budgeting, and Production, ensuring seamless integration and robust functionality.

NDE Digital Market | *.NET REST API, Angular, Bootstrap 5*

- Developed a comprehensive e-commerce platform with custom roles and permissions for buyers, sellers, and administrators, streamlining online sales processes.

Ticketing System | *ASP.NET Core Web API, MSSQL, HTML, CSS, vanilla JavaScript, Bootstrap*

- Created a user-friendly system for easy task ticketing, facilitating systematic tracking and management across various company departments.

TDReader (Desktop Application) | *.NET Framework, MSSQL*

- A specialized tool for extracting and interpreting report data from Tekla Structures, streamlining the analysis of structural engineering and design information.
